Career Objective

I am a backend-focused MERN stack developer with hands-on experience in building scalable and efficient web applications using Express, TypeScript, and MongoDB. Currently working at Sparktech Agency, I collaborate with my team to deliver solutions that align with both user needs and business objectives. I am committed to continuous learning, sharpening my technical expertise, and contributing to impactful projects that drive growth and innovation.

Technical Skills

Core Technologies: MongoDB, Express.js, React.js, Node.js, JavaScript (ES6+), TypeScript

Database Technologies: MongoDB, PostgreSQL, Prisma

Backend Development: Express.js, RESTful API Development, Mongoose (ODM), Authentication & Authorization (JWT)

Frontend Development: HTML5, CSS3, Tailwind CSS, Shadcn UI, Ant Design, React.js (Hooks, Context API), Redux Toolkit, TanStack Query (React Query), Responsive Design

Real-Time & Communication: WebSockets with Socket.io

DevOps & Deployment: Docker, AWS, Vercel, CI/CD, NGINX, DevOps

Tools & Version Control: Git, GitHub, npm, yarn, Postman

Payment: Stripe, SSLcommerz

Job Experience

Jr. Backend Developer — Sparktech Agency

Jun 2025 – Present

- Building and maintaining scalable backend services using Node.js, Express.js, TypeScript, and MongoDB
- Collaborating with a small, agile team to deliver solutions aligned with the client's business needs
- Implementing secure authentication, RESTful APIs, and efficient database models with Mongoose
- Actively improving code quality with validation, error handling, and best practices
- Contributing to team discussions, project planning, and continuous integration workflows

Projects

HappyValley (Backend Service Management System)

GitHub: [backend](#)

A comprehensive and scalable enterprise-grade backend system for managing services, bookings, and subscriptions. Built with a modular architecture designed for high performance, maintainability, and seamless scalability.

Core Features:

- **Authentication:** Secure stateless authentication with JWT and multi-provider social login (Google/Facebook) via Passport.js
- **Booking & Inventory:** Advanced appointment scheduling with real-time availability tracking
- **Smart Grocery Assistant:** AI-powered grocery bot using OpenAI (GPT-4o) for intelligent recommendations
- **Payments & Subscriptions:** Stripe integration for one-time payments and recurring subscriptions
- **Real-time & Communications:** Bidirectional communication via Socket.io and push notifications

Stack: Node.js, Express.js, TypeScript, MongoDB (Mongoose), Stripe, Socket.io, Firebase, AWS S3, OpenAI (GPT-4o), Twilio, Zod, JWT, Passport.js, Git, GitHub, Postman

Asetta Autos (MERN Stack Web App)

[live link](#) | Github > [front end](#) | [backend](#)

A full-stack vehicle marketplace platform built with the MERN stack, designed for smooth browsing, secure transactions, and efficient vehicle management.

Core Features:

- **Authentication:** Secure login/registration with JWT
- **Inventory:** Add, update, and manage car listings with images
- **Search & Filter:** Browse cars by brand, price, category, and availability
- **Booking System:** Schedule test drives and reserve cars
- **Admin Tools:** Manage users, car listings, and approvals
- **Responsive UI:** Optimized for both desktop and mobile

Stack: React.js, Redux Toolkit, TanStack Query, Tailwind CSS, Shadcn UI, Express.js, TypeScript, RESTful APIs, Mongoose (ODM), MongoDB (NoSQL), JWT, Firebase Auth, WebSockets (Socket.io), Vercel, Git, GitHub, Postman, npm, yarn

Education

Diploma in Computer Technology

Dinajpur Polytechnic Institute, Dinajpur | Completed January 2025 | Computer Technology
